T-01051B-13-0394

Dear Sir or Madam:

This filing is being made on behalf of Qwest Communications Company, LLC, d/b/a CenturyLink QCC, Entity Code T-01051B.

Enclosed for filing with the Commission is an original plus thirteen (13) copies of revisions to CenturyLink QCC's Arizona Tariff/Price List No. 2.

In this filing CenturyLink QCC proposes to grandfather Frame Relay and ATM Services due to manufacturer discontinuance of the equipment needed to provide service. Customers have been notified of the grandfathering and will have the option of moving to alternative CenturyLink services such as IQ Networking Private Port.

CenturyLink QC respectfully requests that this proposed changes become effective December 18, 2013.

Acknowledgment and date of receipt of this transmittal are requested. A duplicate letter and self-addressed, stamped envelope are attached for this purpose. If you have any questions regarding this filing, please contact me directly.

Sincerely,

Mark Brinton
Manager Regulatory Operations
Office: (303) 992-5832
e-mail: Mark.Brinton@CenturyLink.com

8.8 *QWAVE*

(M)

A. General

1. Description

Qwest *QWAVE* Service is a wavelength (Lambda) solution that addresses a range of dense wave division multiplexing (DWDM) transport applications including Metro and Inter-City applications. *QWAVE* offers 2.5G (OC48), 10G (OC192), 1GbE and 10GbE LAN PHY unprotected and Protected wavelength services for customers who need high capacity transport and want greater control and visibility of their broadband services. *QWAVE* supports synchronous optical network (SONET) and synchronous digital hierarchy (SDH) protocols.

2. Rates and Charges

Rates and Charges for *QWAVE* will be developed on an Individual Case Basis (ICB) arrangement in response to a bona fide request for service from a customer or prospective customer. ICB rates will be offered to customers in writing and will be made available to similarly situated customers.

9. ADVANCE COMMUNICATION SERVICES OFFERINGS

9.7 METRO OPTICAL ETHERNET

(M)

(M1)

A. General

1. Description

Metro Optical Ethernet (MOE) Service is a flexible, easy-to-use, transport service that uses established Ethernet transport technology. MOE allows customers to connect multiple enterprise locations within a service area using native Ethernet protocol. MOE supports transmission speeds as low as 5 Mbps and up to 1 Gbps.

B. Rate Elements

1. MOE Port

MOE Port is an Ethernet port that is the physical entry point to the shared Metro Optical Ethernet Network. Ethernet Virtual Circuits (EVCs) originate and terminate on a MOE Port. Customers may choose to connect to a 10/100 or 1,000 Mbps port on the Company network. A nonrecurring charge applies per MOE Port.

C. Bandwidth Profile

1. The Bandwidth Profile is bandwidth provisioned over the MOE Port and a monthly rate is assessed per Bandwidth Profile. Customers may subscribe to one of the following:

- 10/100 Mbps Ports: 5 Mbps, 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps and 100 Mbps
- 1,000 Mbps Ports: 100 Mbps, 150 Mbps, 200 Mbps, 300 Mbps, 400 Mbps, 500 Mbps, 600 Mbps, 700 Mbps, 800 Mbps, 900 Mbps and 1,000 Mbps

D. Rates and Charges

Rates and Charges for MOE will be developed on an Individual Case Basis (ICB) arrangement in response to a bona fide request for service from a customer or prospective customer. ICB rates will be offered to customers in writing and will be made available to similarly situated customers.

109. OBSOLETE ADVANCE COMMUNICATION SERVICES OFFERINGS

(N)

109.1 QWEST FRAME RELAY SERVICE

(T)(M)

Effective: December 18, 2013, CenturyLink's QCC Frame Relay Service will no longer be available to new customers or for new orders from existing customers (except to the extent permitted by contract).

(N)

Existing customers of these services will be grandfathered as follows:

- Existing contracts for these services will not be renewed.
- Customers with a contract that expires prior to December 15, 2014 may retain their QCC Frame Relay Service covered by that contract on a month-to-month basis until December 15, 2014.
- Customers with a contract that expires after December 15, 2014 may retain their QCC Frame Relay Service covered by that contract until the expiration of that contract.

(N)

A. General Description

(M)

1. *QWEST FRAME RELAY SERVICE* is a public, fast-packet data network service that employs a form of packet switching analogous to a streamlined version of X.25 networks. The packets are in the form of "frames", which are variable in length, with the payload being anywhere between 0 and 4,096 octets. *QWEST FRAME RELAY SERVICE* supports a variety of simultaneous data applications over a single integrated facility such as data, voice, and video. Transmission of frames between the user sites is on the basis of Permanent Virtual Circuits (PVCs) which are predetermined paths specifically defined in the Frame Relay routing logic. The following Usage Parameters for traffic control and congestion control apply to particular virtual circuits on *QWEST FRAME RELAY SERVICE*:

- Committed Burst Size: The maximum data rate that the Company agrees to handle over a subscriber link under normal network operation conditions.
- Excess Burst Size: The maximum data rate that the Company's network will attempt to transport over a specified period of time, known as the Measurement Interval. At the Company's discretion, the Company may mark the excess frames as Discard Eligible (DE).

(M)

(M) Material moved from Section 9.

109. OBSOLETE ADVANCE COMMUNICATION SERVICES OFFERINGS

(N)

109.1 QWEST FRAME RELAY SERVICE

(T)(M)

A. General Description (Cont'd)

2. Virtual Circuits (VCs) are two-way, software-defined data paths between two ports that act as replacements for private or dedicated leased lines in the customer's network. *QWEST FRAME RELAY SERVICE* supports routing on a pre-established connection or PVC.
3. Port connection provides a gateway into the Qwest Frame Relay network and allocates the network's available capacity to the virtual connections it supports.

B. Terms and Conditions

1. Services are also governed by the Terms and Conditions contained in the Qwest Rates and Services Schedule Interstate No. 3.
2. The provision of *QWEST FRAME RELAY SERVICE* is subject to capacity and facilities availability.
3. *QWEST FRAME RELAY SERVICE* is available under *QWEST TOTAL ADVANTAGE*, *Q.GUARANTEED* and *Q.INTEGRITY* service offerings. Terms and conditions for the provision of *QWEST FRAME RELAY SERVICE*, including, without limitation, monthly recurring and nonrecurring rates, discounts, usage minimums, and term commitments are set forth in the Section 4, preceding.
4. Service Level Availability Guarantees are the same as set forth in the Qwest Rates and Services Schedule Interstate No. 3.

109.2 QWEST ATM SERVICE

(T)(M)

Effective: December 18, 2013, CenturyLink's QCC ATM Service will no longer be available to new customers or for new orders from existing customers (except to the extent permitted by contract).

(N)

Existing customers of these services will be grandfathered as follows:

- Existing contracts for these services will not be renewed.
- Customers with a contract that expires prior to December 15, 2014 may retain their QCC ATM Service covered by that contract on a month-to-month basis until December 15, 2014.
- Customers with a contract that expires after December 15, 2014 may retain their QCC ATM Service covered by that contract until the expiration of that contract.

(N)

A. General Description

(M)

1. *QWEST ATM SERVICE* is a high-speed, connection oriented multiplexing and switching service that uses fixed-length cells to support transmission of multiple types of traffic (such as data, voice and video) over a Local Area Network (LAN) or Wide Area Network (WAN).
2. *QWEST ATM SERVICE* allows for a fixed-length 53-byte cell, which consists of 48 byte payload and 5-byte header, to transport user data across the network. Switching is done based on the contents of the cell header.
3. The Qwest ATM Port Connection provides a gateway into the Qwest ATM Network and allocates the network's available capacity to the Virtual Connections it supports. At least one Port must exist for each customer premises directly connected to the Qwest ATM Network.
4. Virtual Circuits (VCs) are two-way, software-defined data paths between two Ports that act as replacements for private or dedicated leased lines in the customer's network. *QWEST ATM SERVICE* supports cell routing on a pre-established connection or Permanent Virtual Circuit (PVC), or connection on demand basis or Switched Virtual Circuit (SVC). The customer at or prior to connection set up must designate a service category.

(M)

(M) Material moved from Section 9.

109. OBSOLETE ADVANCE COMMUNICATION SERVICES OFFERINGS

(N)

109.2 QWEST ATM SERVICE (Cont'd)

(T)(M)

B. Terms and Conditions

1. Services are also governed by the Terms and Conditions contained in the Qwest Rates and Services Schedule Interstate No. 3.
2. The provision of *QWEST ATM SERVICE* is subject to capacity and facilities availability.
3. *QWEST ATM SERVICE* is available under *QWEST TOTAL ADVANTAGE*, *Q.GUARANTEED* and *Q.INTEGRITY* service offerings. Terms and conditions for the provision of *QWEST ATM SERVICE*, including, without limitation, monthly recurring and nonrecurring rates, discounts, usage minimums, and term commitments are set forth in the Section 4, preceding.
4. Service Level Availability Guarantees are the same as set forth in the Qwest Rates and Services Schedule Interstate No. 3.

(T)

C. Rates and Charges

1. Rates specified in this Tariff for Qwest services requiring dedicated access do not include access and access-related charges, including, without limitation, installation charges, inside wiring charges assessed by the Incumbent Local Exchange Carrier, construction charges assessed by the Incumbent Local Exchange Carrier, and distance and termination charges assessed by the Incumbent Local Exchange Carrier. Therefore access and access related charges are additional charges.
2. Five Quality of Service (QoS) offerings are available for *QWEST ATM SERVICE* PVCs on a per connection basis.
3. Five Quality of Service (QoS) offerings are available for *QWEST ATM SERVICE* SVCs on a per connection basis. Charges for usage for each QoS are based on the number of megabytes (MB) transported across a SVC on the Qwest ATM network per month.
